

FCC please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections! We get to enjoy a complete meal now without those annoying, unwanted phone solicitations. They interrupt several times a day (usually in the evening) while eating or watching a special program on TV that we may have been waiting a whole week or more to enjoy. We, my wife and I, cannot stress enough the importance that this Telephone Privacy law has made in our peace of mind. Thank you for not changing one detail of this very important law.
